We asked AI 280 ways who to hire for Power Platform, ERP integration and workflow automation.

Inturing is #1 in Manufacturing — and 0 of 200 everywhere else.

Before writing this we tested Inturing the way an Australian COO, Operations Director or Finance Lead would. We asked ChatGPT, Perplexity, Google AI Mode, Gemini and Claude seven commercial buyer questions across eight Australian cities (280 answers total), alongside 56 live Google searches. When buyers ask who to hire for manufacturing process automation, Inturing is #1 in Australia — named in 23 of 40 answers and recommended first 16 times. When buyers ask for custom Power Apps, Inturing is named in 8 of 40. Across the other five questions (Power Platform consultants, Power Automate workflows, ERP and system integration, Power BI and Microsoft Fabric, and Copilot Studio agents), the five assistants returned 200 answers and named Inturing zero times. Your rebuilt Lovable site is already bringing in quality enquiries, and AI already cites inturing.com.au 91 times (#3 in Australia). The homepage title just says "for Manufacturers", and the pages for ERP integration, adjacent industries, and an Insights Hub with downloadable lead magnets are not built yet. This document explains the gap and the 3-month programme on your existing Lovable site that closes it.

Prepared for **Inturing (Harry Cribb & Paul Del Gigante)**, Sydney NSW
All data **29 October 2026**

Site tested **inturing.com.au** (28-page Lovable site)

23 of 40

Manufacturing automation answers naming Inturing (#1 in Australia, and ranked first 16 times across ChatGPT, Perplexity, AI Mode, Gemini and Claude)

0 of 200

Answers naming Inturing across Power Platform consulting, Power Automate, ERP integration, Power BI / Fabric, and Copilot Studio

91 links

Times AI assistants cited inturing.com.au across 35 answers — already the #3 most-cited consultancy website in Australia

0 of 56

Commercial Google searches across 8 cities where inturing.com.au ranks in the organic Top 20 today, plus 0 reviews on your Sydney Google profile

WHAT WE FOUND

The Australian shortlist is built from page titles, named ERPs and partner directories.

> "My shortlist: 1. **Inturing** (Best overall fit) — Inturing explicitly targets manufacturers already running Microsoft 365 alongside ERP, MES and engineering systems. Its stated services include automated quote and order processing, shop-floor and inspection apps, supplier workflows, document extraction and operational dashboards. 2. **Norbrik** 3. **TechRam**."
>
> ChatGPT (web search on), asked live on 29 Oct 2026 for a Sydney partner to automate order processing and operations without replacing the ERP. Cited inturing.com.au and inturing.com.au/about directly. Inturing: ranked #1.

> "For a Sydney-based project spanning ERP, CRM, MYOB Acumatica, SAP, and Microsoft 365, the strongest shortlist is: 1. **Eagle360 Consulting** (Best for MYOB Acumatica + Microsoft 365 integration) 2. **Leverage Technologies** (Best for MYOB Acumatica, SAP, CRM, and broader ERP integration) 3. **OneKloudX**."
>
> Perplexity (Sonar Pro, web search on), asked live on 29 Oct 2026 for a Sydney integration partner to connect MYOB Acumatica, SAP, CRM and Microsoft 365. Inturing: not named, not cited.

That second question is the exact work Inturing already delivers. Your published **BBCP** case study connects **MYOB Acumatica, SAP Ariba and SharePoint** to cut order processing time by over 90% and save roughly $150,000 a year, and your **Property Network of Australia (PNA)** case study saves another $150,000 a year automating multi-party property workflows. Perplexity named Eagle360 and Leverage Technologies instead because both publish dedicated ERP

integration pages naming MYOB Acumatica and SAP in the page heading, whereas inturing.com.au has no ERP integration page at all.

ALREADY WORKING

Your rebuilt Lovable site is fast, crawlable, and #1 in Australia for Manufacturing

We inspected all 28 URLs on inturing.com.au. Access is not the problem: AI crawlers and Google receive clean responses, your 3-Minute Assessments (**/assessment/manufacturing-automation** and **/assessment/power-platform**) and ROI Calculator give buyers an immediate next step, and AI assistants cited your website 91 times across 35 answers (behind only Power Platform Experts on 130 links). You do not need to rebuild the site — you need to build on it.

COSTING YOU ADJACENT SECTORS

Your homepage title says "for Manufacturers" — so Google and AI filter you out of 200 buyer searches

The homepage title tag on inturing.com.au is literally **"Inturing | AI Automation & Power Platform for Manufacturers"**. That single line is why you win 58% of manufacturing answers (23 of 40) and 0% of general Power Platform, Power Automate, ERP integration, Power BI and Copilot answers (0 of 200). When a wholesale distributor, civil contractor, property group, or mid-market COO searches for the exact same Microsoft workflows, search engines and AI assistants read your homepage title and assume you only work with factories.

COSTING YOU TRUST

Your 7 adjacent-sector client logos are locked inside image files with zero text on the page

Your site displays client logos for **Burgtec, Schlam, Menai Civil Contractors, AustEx, Liquip Victoria, CBTech and EFS**. Those seven names prove Inturing works across mining equipment, civil engineering, commercial interiors, industrial fluid handling and heavy distribution — not just factory floors. Because they sit on the page as image files with no written captions or workflow summaries, neither Google nor AI assistants can read them.

COSTING YOU RANKINGS

No dedicated ERP Integration page, no Insights Hub or lead magnets, and no city delivery pages

Across 56 live commercial Google searches in Sydney, Melbourne, Brisbane, Perth, Adelaide, Canberra, Newcastle and Hobart, inturing.com.au ranked in the organic Top 20 on **0 of 56 searches**. Rivals with smaller case studies outrank you because they publish dedicated pages for **ERP & System Integration**, **Microsoft Fabric & Power BI**, adjacent industries (Wholesale, Construction, Property), city delivery hubs, and gated ROI guides and checklists.

COSTING YOU CONSISTENCY

Bare country-only schema, an unverified Sydney Google profile (0 reviews), and no Microsoft AppSource listing

Every page on inturing.com.au outputs a bare Organization schema that sets **"areaServed": "AU"** with a relative **"/"** URL — omitting your Sydney headquarters, founders **Harry Cribb** and **Paul Del Gigante**, Service schema, and FAQ schema. On Google Maps, Inturing's Sydney profile shows **0 reviews**, **no street address**, and is filed under generic "Computer support and services". And when ChatGPT and Gemini check **Microsoft's official Partner Directory (AppSource)** and **Clutch**, Inturing is not listed.

THE COMPARISON THAT MATTERS

You already beat every national rival in Manufacturing. They beat you on the other five topics by publishing pages you haven't built yet.

Power Platform Experts (88 mentions) and Eagle360 Consulting (61 mentions, #1 in Sydney overall) do not have stronger operational case studies than Inturing's $150,000/year BBCP and

PNA builds. They win the general Power Platform, ERP and reporting shortlists because their websites publish separate pages for each integration, industry and city.

SIGNAL READ BY GOOGLE & AI	INTURING (INTURING.COM.AU)	POWER PLATFORM EXPERTS & EAGLE360
Manufacturing automation AI answers	23 of 40 (#1 in Australia · 16× ranked #1)	Power Platform Experts: 9/40 · Eagle360: 14/40
Custom Power Apps AI answers	8 of 40 (5× ranked #1)	Power Platform Experts: 24/40 · Barhead: 14/40
Other 5 topics (Power Platform, Automate, ERP, BI/Fabric, Copilot)	0 of 200	Power Platform Experts: 55/200 · Eagle360: 36/200 · Professional Advantage: 59/200
Homepage title positioning	"AI Automation & Power Platform for Manufacturers" (filters out non-manufacturers)	Broad commercial Microsoft Power Platform, ERP & BI positioning
Dedicated ERP Integration page	None (MYOB Acumatica & SAP Ariba buried inside BBCP case study)	Dedicated MYOB Acumatica, Dynamics 365, SAP & API integration pages
Industry pages on website	Manufacturing and Public Sector only	Manufacturing, Wholesale/Distribution, Construction, Property, Finance & Government
Insights Hub & Lead Magnets	3 blog posts; no gated Case Study PDF, Checklist or ROI Guide	Resource hubs, implementation guides, and downloadable templates
City delivery pages	None ("Sydney & Australia-wide" mentioned in footer only)	Dedicated Sydney, Melbourne, Brisbane & Perth consultant pages
Sydney Google Business Profile	0 reviews, no street address, "Computer support and services"	Verified street address, reviews & software/consulting categories
Structured data & /llms.txt	Bare Organization schema only; /llms.txt returns 404	Service & LocalBusiness schema + Microsoft AppSource / Clutch profiles

Closing the gap between 31 and 90+ AI recommendations does not require reinventing Inturing's delivery model. It requires tightening the positioning on your existing Lovable site so adjacent sectors are welcomed in, and building out the solution, industry, and Insights Hub pages that answer the other five buyer questions.

CONSULTANCIES AI NAMED ACROSS AUSTRALIA	AI ANSWERS (/280)	DOMAIN LINKS IN AI	WHAT AI SHORTLISTS THEM FOR
Power Platform Experts	88	130	Power Platform consulting (21/40), Power Automate (24/40), Power Apps (24/40), Power BI (10/40)
Office Experts	72	35	Power Platform, Power Automate & Microsoft 365 workflow automation across all 8 cities
Professional Advantage	70	20	ERP integration (17/40), Power Platform (21/40) & Power BI/Fabric (15/40); 399 historical Google AI Overview mentions
Eagle360 Consulting	61	51	#1 in Sydney overall (15/35); Manufacturing automation (14/40), ERP integration (12/40), Power Automate (12/40)
Barhead Solutions	57	18	Power Platform consulting (19/40), Power Apps (14/40) & Copilot Studio agents (14/40)
Velrada	46	20	Enterprise Power Platform (19/40), Copilot Studio (9/40) & Perth/National Microsoft workloads
Leverage Technologies	18	14	#1 specialist for MYOB Acumatica & SAP ERP integration (18/40); 315 historical Google AI Overview mentions
Inturing	**31**	**91**	**#1 in Manufacturing automation (23/40, 16× #1) & Custom Power Apps (8/40); 0/200 on the other 5 questions**

THE DIAGNOSTIC

What buyers and AI actually searched for

When operations leaders and AI assistants evaluate a consultancy, they look for specific pages matching the system, workflow or industry in question. Here are the seven buyer questions we

tested across all eight cities, and what they found on inturing.com.au.

WHAT BUYERS & AI SEARCHED FOR	WHAT THEY COULD FIND ON INTURING.COM.AU
Manufacturing process & shop-floor automation without replacing ERP	**A clean hit (23/40 answers, 16× #1).** Assistants found **/manufacturing**, the Manufacturing Assessment tool, and the BBCP case study (>90% faster order processing, ~$150k/yr saved).
Custom Power Apps developer for field, warehouse & quality inspections	**Partial hit (8/40 answers, 5× #1).** Assistants found **/power-apps** and your offline mobile app examples across Sydney, Melbourne, Brisbane, Perth, Adelaide, Canberra and Newcastle.
Microsoft Power Platform consultants (general mid-market operations)	**Filtered out (0/40 answers).** The homepage title says "for Manufacturers", so assistants skip Inturing when non-manufacturing businesses ask for a Power Platform partner.
Power Automate & workflow automation (approvals, POs, onboarding)	**Cited in background only (0/40 named, cited twice).** Perplexity cited **/workflow-automation** and **/power-automate** as reference articles, but did not shortlist Inturing for non-manufacturing buyers.
ERP, CRM, MYOB Acumatica, SAP Ariba & SharePoint integration	**Nothing dedicated (0/40 answers).** You have delivered live MYOB Acumatica, SAP Ariba and Dynamics 365 integrations, but there is no ERP Integration page on the site.
Power BI & Microsoft Fabric executive and operational reporting	**Nothing on Fabric (0/40 answers). /data-analytics** covers general dashboards, but never names Microsoft Fabric or CFO/COO multi-entity reporting across ERP and finance systems.
Microsoft Copilot Studio & custom AI agents connected to internal data	**Too thin to shortlist (0/40 answers). /ai-automation** and **/copilot** describe AI readiness, but lack concrete Copilot Studio agent architectures and governance proof.
Wholesale, Civil Construction & Property operations automation	**Locked in image logos.** Menai Civil Contractors, Schlam, Liquip Victoria, AustEx and Burgtec are shown as image logos only, and PNA is not linked from an industry hub.

Seven buyer questions, two strong hits and five misses caused by missing pages and a narrow homepage title. Every row above maps directly to the 3-month Lovable build programme Harry outlined.

THE DEMAND

Where real Australian demand sits across AI and search

Before building new solution and industry pages on Lovable, we measured monthly Australian AI prompt volume across the core Microsoft Power Platform, reporting, AI agent and ERP integration terms (3,418 tracked monthly AI prompts in Australia), alongside our 56-query Google organic benchmark.

SEARCH / AI TOPIC	AU AI PROMPTS / MO	12-MONTH PEAK	INTURING PAGE & CURRENT STATUS
power bi & power bi consultant	1,674	2,796 (Oct 2025)	/data-analytics — 0/40 AI mentions, not ranking in Google Top 20
microsoft copilot	551	667 (Dec 2025)	/copilot — 0/40 AI mentions, not ranking in Google Top 20
power apps	399	473 (Oct 2025)	/power-apps — **8/40 AI mentions (5× #1)**, not in Google Top 20
power automate	338	360 (Dec 2025)	/power-automate — 0/40 AI mentions (cited twice), not in Google Top 20
ai automation & ai automation agency	166	180 (Jan 2026)	/ai-automation — strong in Manufacturing (23/40), 0/40 for general buyers
copilot studio	117	117 (Sep 2026)	No dedicated Copilot Studio agent page (+38% YoY growth in AU)
microsoft fabric	79	106 (Mar 2026)	None — Microsoft Fabric is never given a dedicated page on the site
workflow & business process automation	56	88 (Dec 2025)	/workflow-automation — needs adjacent-sector proof (wholesale, civil, property)
microsoft power platform	21	21 (Sep 2026)	Homepage & /assessment/power-platform — blocked by "for Manufacturers" title
erp integration (MYOB Acumatica, SAP, D365)	16	76 (Dec 2025)	None — highest commercial deal value, zero dedicated page today

Notice the commercial pattern: the highest-volume searches (Power BI, Copilot, Power Apps, Power Automate) and the highest-margin project searches (ERP integration across MYOB Acumatica, SAP Ariba and Dynamics 365) are the exact areas where Inturing already has delivery proof, but lacks the dedicated Lovable pages and positioning to capture them.

SCOPE OF WORK

Six workstreams on your existing Lovable site

Everything below maps directly to Harry's 3-month brief and the audit findings above. We build directly inside your existing Lovable site — keeping what already converts while opening up adjacent sectors, search rankings, and lead capture. Per your brief, **social media, ongoing blog/newsletter content and PR are out of scope**.

01

GA4, Search Console, event tracking and HubSpot lead capture set up early

Before new pages and lead magnets launch, we wire end-to-end analytics and CRM attribution across the Lovable site in Weeks 1–2 so every enquiry is traced back to its exact Google, AI or referral source.

- **GA4 and Google Search Console setup:** Clean installation across Lovable's client-side routing, domain verification, XML sitemap submission, and baseline indexation audit.
- **Custom event tracking built in:** Track 3-Minute Assessment starts and completions (**/assessment**, **/assessment/manufacturing-automation**, **/assessment/power-platform**), ROI Calculator usage, lead magnet downloads, and meeting bookings.
- **HubSpot lead capture and attribution:** Connect all Lovable forms and gated asset downloads directly into HubSpot with hidden UTM, landing page, and AI referrer capture (tracking leads from ChatGPT, Perplexity and Google).

02 Tighten positioning and messaging (manufacturing-led, open to adjacent sectors)

You keep your #1 authority in Australian manufacturing while removing the "factories only" filter that currently costs you 200 out of 280 buyer shortlists.

- **Positioning overhaul on the Lovable homepage:** Shift from "for Manufacturers" to **"Operational AI, Power Platform & ERP Automation — Built in Manufacturing, Proven Across Wholesale, Construction, Property & Mid-Market Operations."**
- **Turn your 7 image-only client logos into quotable proof:** Add concise written industry and workflow summaries beneath **Burgtec, Schlam (mining/heavy equipment), Menai Civil Contractors (civil engineering), AustEx, Liquip Victoria, CBTech and EFS** in plain HTML text.
- **Surface your $150,000/yr savings proof site-wide:** Bring the **BBCP** (>90% faster order processing across MYOB Acumatica, SAP Ariba & SharePoint) and **Property Network of Australia (PNA)** outcomes onto your core service headers.

03 SEO & keyword research + build out solution and industry pages on Lovable

We complete full commercial SEO and AI keyword research to map where real demand sits, then design, write and ship the missing solution, adjacent industry, and city pages directly inside your existing Lovable codebase.

- **Commercial SEO and keyword blueprint:** Map high-intent search volume and buyer questions across ERP integration, Power Platform consulting, Power Automate, Power BI / Fabric, and Copilot Studio to specific Lovable routes.
- **New Solution pages built on Lovable:** Dedicated **ERP & System Integration** page (MYOB Acumatica, SAP Ariba, Dynamics 365, SharePoint, Monday.com), upgraded **Power BI & Microsoft Fabric** operational reporting page, and **Copilot Studio & AI Agents** page.
- **New Adjacent Industry pages built on Lovable:** Dedicated industry pages for **Wholesale, Distribution & Supply Chain**, **Civil Construction, Engineering & Field Services**, and **Property & Multi-Party Operations**, plus an expanded Public Sector page.
- **City delivery hubs:** Commercial landing pages for **Sydney (HQ), Melbourne, Brisbane and Perth** so Inturing ranks in local Google searches and city-level AI shortlists.

04 Build an Insights Hub (/insights) plus 3 HubSpot-gated lead magnets

Operations directors and CFOs often research architectures and ROI internally before booking a call. We will build a clean Insights Hub on the Lovable site and produce the three exact lead magnets from your brief:

- **Insights Hub (/insights) on Lovable:** Filterable resource hub matching your current UI, wired to HubSpot lead capture forms, your 3-minute assessments, and Harry's booking calendar.
- **Lead Magnet 1 — Case Study Download:** *"How Australian Operations Teams Save $150,000+/Year Automating Order-to-Invoice & ERP Workflows"* (technical and commercial breakdown of the BBCP and PNA builds).
- **Lead Magnet 2 — Practical Checklist:** *"The 15-Point ERP & Spreadsheet Automation Readiness Checklist for COOs and Operations Leaders."*
- **Lead Magnet 3 — Executive ROI Guide:** *"The Mid-Market ROI Guide to Microsoft Power Platform & Copilot Studio: Realistic Costs, Timeframes and Payback Windows in Australia."*

---

05 On-page and technical SEO built in (plus Google profile & partner directories)

Because Lovable sites render as modern web apps, we build clean technical SEO, route metadata, and machine-readable entity schema directly into every page.

- **On-page and technical SEO across all Lovable routes:** Unique title tags, meta descriptions, canonical tags, OpenGraph tags, H1–H3 hierarchy, internal linking, XML sitemap, and a complete **/llms.txt** file.
- **Full JSON-LD schema on every page:** Replace the bare country-only schema with **ProfessionalService** schema (Sydney HQ, ABN, founders Harry Cribb and Paul Del Gigante), **Service** schema for each solution, and **FAQPage** schema.
- **Sydney Google Business Profile & Partner Directories:** Verify your Sydney Google profile, update categories from "Computer support" to **Business Management Consultant & Software Company**, set up a simple client review flow, and publish profiles on **Microsoft AppSource** and **Clutch**.

06

Weekly catch-up throughout & fixed monthly measurement

- **Standing weekly catch-up call:** Weekly 30-minute sprint catch-up with Harry and Paul throughout the 3 months to review shipped Lovable pages, lead magnet progress, Search Console indexing, and HubSpot enquiries.
- **Fixed 280-answer & 56-SERP yardstick:** Every 30 days we re-run the exact same 280 AI buyer questions and 56 commercial Google searches from this audit, alongside GA4 and HubSpot conversion reporting.

TIMELINE

The first 90 days

MONTH 1 · TRACK, REPOSITION AND FIX FOUNDATIONS

GA4, Google Search Console, custom event tracking and HubSpot lead capture set up in Weeks 1–2. Full SEO and AI keyword research signed off. Lovable homepage positioning tightened (manufacturing-led, open to adjacent sectors) and written proof added under all 7 client logos. Route-level technical SEO, JSON-LD schema, /llms.txt and the Sydney Google Business Profile aligned. Dedicated **ERP & System Integration page** shipped on Lovable. Weekly catch-ups running from Week 1.

MONTH 2 · SOLUTION PAGES, ADJACENT INDUSTRIES AND INSIGHTS HUB

New adjacent industry pages (**Wholesale & Distribution, Civil Construction & Field Services, Property Operations**) and upgraded **Power BI / Microsoft Fabric** and **Copilot Studio** solution pages built and shipped on Lovable. **Insights Hub (/insights)** launched with **Lead Magnet #1 (Case Study Download)** gated via HubSpot. Sydney and Melbourne commercial delivery pages live. Microsoft AppSource and Clutch profiles submitted. Month 2 benchmark re-run.

MONTH 3 · LEAD MAGNETS, CITY EXPANSION AND COMPOUND

Lead Magnet #2 (15-Point Readiness Checklist) and **Lead Magnet #3 (Mid-Market ROI Guide)** published on the Insights Hub with HubSpot capture. Brisbane and Perth commercial delivery pages live. Internal linking and conversion pass across all Lovable pages, assessments, and ROI calculators. Iteration pass on any page that has not moved. Full 90-day review against the 280-answer and 56-search baseline.

To be straight with you about timing: GA4/HubSpot tracking, the tightened homepage positioning, the written client proof, and the Google profile fixes go live in the first few weeks. New Lovable solution and

industry pages typically take six to ten weeks to climb Google rankings, and AI shortlist gains compound as those pages and partner directories index.

HOW TO WORK WITH US

Three ways to get started

Three levels for the 3-month programme, all month-to-month with no lock-in. The difference between them is the pace of Lovable page builds, lead magnet production, and directory/authority placements each month. Early GA4, Search Console and HubSpot setup, positioning refinement, technical SEO, and the weekly catch-up are included at every level.

FOUNDATION

$3,000

per month + GST

3-Month Total: $9,000 + GST

- GA4, Search Console & HubSpot event tracking set up early (Weeks 1–2)
- SEO & AI keyword research matrix + homepage positioning overhaul
- Technical SEO built into Lovable: route meta, JSON-LD schema, sitemap & /llms.txt
- Written proof blurbs added for all 7 client logos on the site
- **4 new Lovable solution/industry pages** + Insights Hub setup with 1 lead magnet across the 3 months
- Weekly 30-min catch-up & monthly 280-answer benchmark report

RECOMMENDED

GROWTH

$4,500

per month + GST

3-Month Total: $13,500 + GST

- **Everything in Foundation** (full Harry Cribb 3-month brief covered end-to-end)
- **Full solution & industry page build on Lovable** (ERP Integration, Fabric/BI, Copilot Studio, Wholesale, Civil, Property + 4 city hubs)
- **Insights Hub (/insights) + all 3 HubSpot-gated lead magnets** (Case Study download, 15-Point Checklist & ROI Guide)
- Sydney Google Business Profile overhaul & client review flow
- Microsoft AppSource, Clutch & partner directory placements
- Weekly catch-up call + HubSpot & AI lead attribution tracking

AUTHORITY

$6,000

per month + GST

3-Month Total: $18,000 + GST

- **Everything in Growth**
- **Accelerated Lovable build pace:** additional ERP-specific sub-pages (MYOB Acumatica, SAP Ariba, Dynamics 365, Pronto) + all 8 Australian city hubs
- **5 gated lead magnets & interactive tools** + conversion rate optimisation on the 3-minute assessments
- Aggressive earned mention & directory push (7 placements/mo)
- One original Australian manufacturing & operations automation data study for industry citations
- Live Looker/GA4 attribution dashboard & priority strategy support

All plans are month-to-month with no lock-in, and prices exclude GST. Social media, ongoing blog/newsletter content and PR are excluded per your brief. Given that the 3-month brief includes early GA4/Search Console/HubSpot setup, positioning, building out the missing solution and adjacent industry pages on Lovable, and launching the Insights Hub with all three lead magnets (Case Study download, Checklist, and ROI Guide), **Growth ($4,500/mo + GST · $13,500 + GST over 3 months)** is the level we recommend starting on.

Month to month

30 days notice, no exit fees, no setup fee.

You own everything

All Lovable pages, lead magnets, schema, GA4/HubSpot setups and reports stay in your accounts.

Fixed yardstick

The 280-answer prompt panel and 56-search pool are set at baseline and never swapped.

Honest promise

We promise the work, shipped on Lovable and measured weekly. Nobody can guarantee rankings or AI placements.

To start: reply with the plan you want and we send the agreement and the Week 1 onboarding checklist (Lovable, GA4, Search Console and HubSpot access) the same day. Happy to walk through any line of this with you and Paul on a call first, including running the live ChatGPT and Perplexity tests together.
